CAGE LAYING HOUSES

"California Type"

COOPERATIVE FARM BUILDING
PLAN NO. 5845
(2 SHEETS)

PLAN EXCHANGE

These individual cage laying houses are designed for use in warm areas not subject to high winds or to snow loads over 10 pounds per square foot.

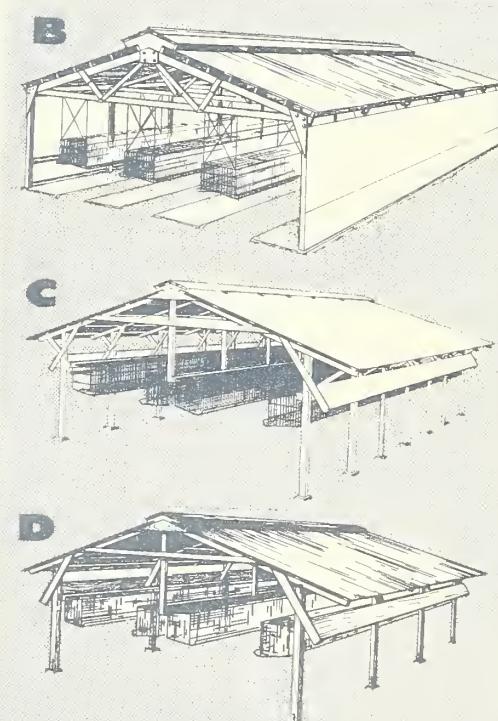

Building lengths may be varied to provide the desired capacity.

The working drawings show construction details for the four types illustrated: *A*, Two-row, open; *B*, six-row with slatted walls; *C*, four-row, open; *D*, four-row, open. Posts are spaced 4 feet, center to center, for types *A* and *C*; and 8 feet, center to center, for types *B* and *D*.

Complete working drawings may be obtained through your county agent or from the Extension agricultural engineer at most State agricultural colleges. There is usually a small charge.

ORDER PLAN NO. 5845, CAGE LAYING HOUSES,
CALIFORNIA TYPE.

If working drawings of this plan are not available in your State, write to the U.S. Department of Agriculture, Agricultural Engineering Research Division, Plant Industry Station, Beltsville, Md. The U.S. Department of Agriculture does not distribute drawings, but will direct you to a State that does distribute them.

Issued April 1959
